

Dr Chaniotis is working as Manager System Development at ENTSO-E since 2009, with focus on areas such as the Ten-Year Network Development Plan, the Network Codes for grid connection, and the 2050 grid development plan. He started his career at the R&D centre of EDF in France in 2001 working on the areas of congestion management and market power. In 2003 he joined RTE France, working on capacity allocation mechanisms on interconnections and market coupling. Dr Chaniotis holds a PhD in electrical engineering from the University of Illinois, and an MBA from INSEAD.
